

KC75 PRO

High performance
window system

Flush design. Premium performances.

The **KC75 PRO** is a premium aluminium window system ideal for both new builds and renovation building projects. It stands out as the optimal choice for any commercial or residential jobs that require guaranteed security, thermal efficiency, and slim sightlines products.

Available in top-hung and side-hung applications, the system features an innovative central gasket and a thermally improved polyamide that reduces drastically U values. Furthermore, the product can be dry-glazed internally or externally using clip-in beads.

KC75 PRO casement system is fully compliant with current Building regulations and it has been PAS-24 approved guaranteeing extra security to any project.

Flush design & ultra-slim sightlines

The KC75 has been upgraded with a bold and slim new look. The product is now available in different design options: a stylish and contemporary casement aesthetic, or a flush option. From ultra slim sightlines outer frame to sash of only 65 mm in standard sash to 75 mm in flush option.

Fabricator friendly and cost-effective solution

Thanks to its fabricator friendly design, KC75 PRO can be quickly and easily fabricated to tight deadlines. It is fully compatible with Exlabesa systems and accessories range allowing to use standard Exlabesa corner cleats, gaskets, beads, cills, corner posts or add-ons.

Features

- Ultra slim version featuring sightlines of only 65 mm and 75 mm
- Top & side hung applications
- Internally or externally beaded
- Mechanical or crimping cleats option
- Cills, couplers, add-ons and curtain walling inserts available
