

Capabilities to match your dreams

Macroextrusion

Our technical capacity sets us apart and our knowledge makes us unique. We are a global leader in the production and extrusion of extra large aluminium sections of high technical complexity. We have two of the largest and most technologically advanced extrusion presses in Europe: 65 MN and 85 MN. All our technical and Production capabilities, together with our experience and know-how, allow us to take aluminium extrusion where others can not, beyond its limits.

Maximum diameter: 700 mm | Maximum length: 28 000 mm | Maximum weight: 120 kg/m
